

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for the City of St. Clair

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During February 1, 2025 to February 28, 2025, we did not sample for disinfection byproducts (DBPs). Therefore, we cannot be sure of the quality of your drinking water during that time. Samples were collected on January 31, 2025, but could not be counted for compliance.

What should I do? There is nothing you need to do at this time. This is not an emergency. You do not need to boil water or use an alternative source of water at this time. Even though this is not an emergency, as our customers, you have a right to know what happened and what we are doing to correct the situation.

The table below lists the contaminants we did not properly test for, how often we are supposed to sample for these contaminants, how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the dates we will collect follow-up samples.

| Contaminant | Required sampling frequency | Number of samples taken | When all samples should have been collected | Date additional samples will be collected |
|--------------------|------------------------------------|--------------------------------|--|--|
| DBP | 2 sample every three months | 0 | February 1, 2025 – February 28, 2025 | May 1, 2025 – May 31, 2025 |

What happened? What is being done? Samples were collected outside of the required sampling period and were not able to be used for compliance purposes. We are making every effort to assure this does not happen again. We will be collecting follow-up samples.

For more information, please contact Jay Silvers 810-329-5276

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the city of St. Clair.
